

BOSanova Web

Now your iSeries can be upgraded to enable full web benefits through the best iSeries emulation available BOSanova Web measurably extends the life cycle and capabilities of your iSeries.

BOSanova Web is an enterprise-wide, centrally and remote managed, Java-based solution that provides AS/400-to-desktop TN5250e GUI display emulation, SCS printer emulation, and native AS/400 SQL data transfer. PC users attached to an AS/400 via an intranet, extranet, or the Internet access this application using Internet Explorer Web browser. BOSanova Web's security features, based on SSL encryption mechanisms, ensure a safe and secure connection to the AS/400 via the Web.

✓ Gain central management and control	✓ Deploy proxy for customization to your network
✓ Save through a web management interface	✓ Provide secure access to iSeries for remote web users with SSL
✓ Reduce maintenance at workstation	
✓ Print via the web	✓ Align easily into the existing enterprise network architecture

BOSanova Web slashes communication costs, ensures a friendly, transparent work environment, installs rapidly and easily without a client install and delivers a very fast ROI.

Add up the Advantages

Centralized

Loaded on a central server and managed by a network supervisor, BOSanova Web allows normal user changes to occur hassle-free. Whether you are moving users to new workstations, upgrading software, pushing out new applications, or enhancing security, users simply log on to receive the correct workstation parameters for their jobs.

Web Network Supervisor

The server and users are managed easily and economically via the browser. The Network Supervisor can change or modify parameters from any enterprise computer whether internal or external. No need to use the server's computer for changes or upgrades. It is all done seamlessly via the web and from a remote workstation.

Zero Maintenance

Application upgrades and parameter changes are automatically delivered to end users as soon as they log on via the browser to the web server integrated into BOSanova Web.

BOSanova Web eliminates the need for both additional "push" software and expensive technical support at the desktop. What's more, the client/server architecture means current cache capabilities can be used, thus enabling upgrades in real-time.

Total Security

The architecture allows all internal and external iSeries users to benefit from the network. Users access the iSeries through the BOSanova Web server which incorporates a web server. The server encodes all transmitted information, complying with SSL standards, amplified by user verification via a client certificate.

Printing via the Web

BOSanova's successful Printer Client technology is embedded in BOSanova Web to enable you to print via the web. BOSanova Web fully supports all printouts and printers.

Multi Environments

BOSanova Web can be installed in tree environments: iSeries Native, Microsoft, Linux.

BOSanova Web Server

For iSeries AS/400-Based Installation:

- Network connection: TCP/IP
- Operating system: (OS/400) V4R2 (or higher) with JDK version 1.1.6 (1.1.8 for V5Rx) installed

For PC-Based Installation:

- iSeries AS/400 connection:
- OS/400 V2R3 (or higher)
- TCP/IP line
- PC: Pentium 500 MHz recommended (133 MHz minimum)
- Memory: 256 MB recommended (64 MB minimum)
- Hard disk: 18 MB minimum
- Network connection: Network-operable with TCP/IP protocol
- Operating system: Windows NT / 2000 / XP

BOSanova Web Client

- Microsoft Internet Explorer 4.01 (or higher) Web browser
- For printing and workstation ID (V3R2, V3R7, V4Rx-2433) support, the correct PTFs must be installed.

Ordering Information

PID:	Description
2510	BOSanova WEB - Base Install, includes server and 10 client licenses
2511	BOSanova WEB - Additional Client Licenses (10 User Minimum)
MJAS	BOSanova WEB - Server Warranty Extension at time of purchase
MJAC	BOSanova WEB - Client Warranty Extension at time of purchase
